

## Ideas for Snow Day

### **Explore the snow with your child.**

- Count their footsteps in the snow.
- Have fun building a snowman - What can you use to make the facial features and buttons?
- Bring some snow inside. Talk about what is happening as it melts. Why is it melting?
- Record your child's experiences of the snow in their 'Me and My World' book so they can share their memories with their friends.
- If you access the weekly Newsletter there will be ideas that you can also do at home with your child that link to our most recent learning.
