Well done runners !!

!! Reminder !!

Next week is the last week of after school clubs

Taking antibiotics puts you and your family at risk

No one likes being sick and it's especially upsetting when your child is ill, but it's important to remember that antibiotics aren't always needed. In fact, taking antibiotics when they are not needed puts you and your family at risk of longer and more severe illnesses in the future. Always take your doctor's advice on antibiotics.

Make the freezer your friend

Stock up your freezer with bags of frozen peas, broccoli and mixed veggies and simply pop 'em in the pan when you're cooking pasta, soups or curries. They won't blow the budget and count towards your kid's 5 A Day!
