

English

In English this half-term, we will be studying the book *The BFG*. This will be alongside Guided Reading. The children will take part in numerous activities and will be practising a range of writing styles including newspaper reports, play scripts and poetry.

Suggestions of ways you can support your child's English: Ask your child about grammar at school and how they would use this.

Science

Our science topic for this half-term is the human body. The children will be naming the bones of the body and thinking about how muscles work. As usual, the children will develop their scientific enquiry skills by working practically to explore this topic and will create a moving hand.

Extra Information

PE: Our PE days are Tuesday and Thursday. Please ensure children are wearing correct PE kit and no jewellery on these days (earrings can be taped up at home if needed).

Water Bottles: REALLY IMPORTANT THIS TERM!!! Please ensure that your child brings sufficient water for the whole school day. If this is a shop bought bottle, please ensure that this is clearly labelled with your child's name. Do remember that we are a water only school.

Homework: Is on Google Classroom every week. Please encourage your child to complete this so they can receive their merits.

TTRS: There will be regular times table rock stars battles throughout the half term with rewards to be earned!

Year 3 Learning Overview Summer Two

Trips and Experiences

We have now been on all of our school visits and had just about all of our visitors in. We have a VR workshop to enhance the children's learning in history.

We still have plenty of hands on learning to keep us engaged and motivated to learn and of course we will be preparing to dazzle you at the Kenningtons Festival.

We also look forward to our inter-house sports events.

Maths

The children will be building on their prior knowledge of time this term. They will learn to solve problems involving £ and p. and they will use clocks with Roman numerals on, read the time to the minute and how to convert time from analogue to digital and vice versa.

Suggestions of ways you can support your child's Maths: Time is a tricky concept for the children to learn so plenty of real-life practice with your child will help them. You are already an expert at telling the time and so you are well placed to support them.

Topic

We continue learning about life in Ancient Egypt. The children will learn about the gods and goddesses, hieroglyphics and how the modern world found out about Ancient Egyptian life. The children will develop their historical enquiry skills by using a range of sources to find out about the past.

Spellings for this half-term are on Google Classroom, please encourage your child to practise these and use them in full sentences.
